

Create IBM Watson IoT Platform And Device

The screenshot displays the IBM Watson IoT Platform web interface. The browser's address bar shows the URL `1z43an.internetofthings.ibmcloud.com/dashboard/devices/browse`. The page header includes the IBM logo and a user profile with email `960219106146@smartinternz.com` and ID `1z43an`. The main navigation bar contains tabs for `Browse`, `Action`, `Device Types`, and `Interfaces`, along with an `Add Device` button. The left sidebar features icons for various IoT management functions. The central content area is titled `Recent Events` and contains a message: "The recent events listed show the live stream of data that is coming and going from this device." Below this message is a table with the following data:

Event	Value	Format	Last Received
event_1	{"Temperature":27,"Humidity":63}	json	a few seconds ago
event_1	{"Temperature":18,"Humidity":71}	json	a few seconds ago
event_1	{"Temperature":15,"Humidity":26}	json	a few seconds ago
event_1	{"Temperature":47,"Humidity":46}	json	a few seconds ago

At the bottom of the table, it indicates "Items per page 50" and "1-1 of 1 item". A status box at the bottom right of the dashboard shows "1 Simulation running". The Windows taskbar at the bottom displays the system clock as 13:14 on 02-11-2022, with a weather widget showing 29°C and Cloudy.
